Students must have at least a beginner's understanding of glass fusing prior to joining this class. The instructor will be on site and available to answer questions, but there will be no formal lessons during this class. All glass used in this class must be Bullseye brand fusible glass (COE90). Students will have equal kiln space available during each class (approximately 192 sq. in.) and their projects must fit within these parameters. Larger pieces or high volume work will be completed at the instructor's discretion. Students will have access to frit and molds, but all other supplies and tools must be provided by the student. Students must wear closed-toed shoes in the glass studio and should plan to bring or purchase a lint-free microfiber towel. Glass - Pattern Bars Strip Cut Constructions

Age: 16yrs. and up.

Students will learn to create pattern bars & cut them into slices using a tile saw. These pattern bar slices will then be used in other fusing projects. After creating some pattern bars, you will learn to cut strips of 3/8" wide glass and stand them on edge to create a pre-determined pattern. Afterwards, you will incorporate some of your pattern bars into the strip cut design and fuse it all together for a beautiful, practically bubble free glass blank that will then be slumped into a bowl or plate form. Pattern bar pieces can also be fused together without added strips to create bowls or plates. Come, learn something new to add to your glass repertoire!! Please note - we will not be running regular fusing schedules in this class, so please do not take it to use it as an open studio. As with all our glass classes at Pullen, closed-toed shoes must be worn in the glass studio. Students should bring a microfiber or other lint free cloth to use when cleaning their glass. Students should expect to spend about \$45 or more on glass to complete their projects. All glass used must be Bullseye compatible, 90 COE.
